

## GLASSWORKING PROTECTIVE EYEWEAR SPECIFICATIONS

### Glass Lens Blanks

- 6 Base Lens Blanks

**Protection Option:** Phillips 202  
**Lens Blank Part Number:** GB-P2-LB

Phillips 202 Glass is very efficient in filtering sodium flare in addition to providing ultraviolet protection to 390 nm. The Phillips 202 is becoming a preferable choice of hot glass workers. It is very comfortable for viewing under high ambient light conditions such as when working with hot glass or glowing heat sources for a duration of time. Also, although it has a relatively low luminous transmission of 38%, it is not recommended for sun protection use unless UV filtering coatings are applied.

### Phillips 202 Filter

Sample thickness: 2.97mm

Liability Disclaimer: Phillips Safety Employees are not optometrists and can only make suggestions concerning eye protection. There are many types of eye protection available and we manufacture as many as possible. Phillips Safety Products does not accept any liability concerning eye damage arising from the use, misuse, or non-use of any eyewear products we sell.
